

Friends should tell friends about the advantages of MC Federal Credit Union membership! As a senior in high school looking towards my future, financial concerns are becoming more prominent. As a member of the credit union, I am continuing to learn and benefit from my membership. My friends would benefit too! The credit union helps in all stages of life. My savings account has allowed me to earn interest on my deposits over the years and will now help pay for college. Student loans are available to bridge the gap in tuition expenses. Since I am frequently out of cash in my wallet, free local ATM withdraws come in handy and the app helps me locate free ATMs anywhere I go. Free checking and digital banking make it easy to manage my finances while away at college. There are also competitive home, car, and personal loan options that will benefit me in the future. Everything MC Federal Credit Union does is focused on helping me, their member, be financially successful throughout my lifetime. I am treated like a friend, not a number, and there are persons available to help me at any time. Furthermore, I value my membership because MC Federal Credit Union believes in making the local community a better place. I like that my membership benefits other members and vice versa. At MC Federal Credit Union, it really is **Friends Helping Friends!**
