

MC Scholarship- Essay Answer:

During my upcoming college years, I will apply the ideals of strong community and service by getting more involved with clubs and organizations on campus. I hope to broaden my understanding of different types of organizations- not just finance and Information Systems and Analytics, which are my majors. There are other clubs than the Service Club that I am involved in that do service projects- which I will be looking into for the upcoming fall semester. Along with joining more clubs, I also plan to become an RA to help create strong communities within the residence halls on campus. I will plan events for residents to attend, and open opportunities for incoming residents to mingle and get to know each other. By becoming an RA on campus, I can have more chances to help students who may feel uncomfortable or shy to make friends and talk to others who are in the same boat as them. I feel it is extremely important to have community and service in any place of work or of living, and I feel strongly about my efforts to help create that on Shippensburg University's campus during my college years.
